

State of Washington

Current Contract Information

Effective dates: November 3, 2000

Revision date: November 3, 2000

Contract number: **01998** (replaces 06495) **Commodity code:** 9620

Contract title: Chemical Road Deicer

Purpose: Update DustChem supplier information and add pricing for American West's CalBan C70 product to additional WSDOT delivery locations.

Term: May 15, 2000 – **Through** – May 14, 2001

For use by: Washington State Department of Transportation, Political Subdivisions of Washington and Oregon states.

Contract type: This contract is designated as **mandatory** for WSDOT **and convenience** for Political Subdivisions..

SCOPE OF CONTRACT This contract is awarded to **multiple** contractor(s).

Contractors : See Attachments **Contact:** See Attachments

Address: Please reference the attachments for listing of contractors.

Products available: **CMA, CG90 10% & 22% and FreezGard Zero-Shields, and Cal-Ban**

Special notes: See Below

Related product contracts: For sidewalk application of deicer contact OSP Central Stores.

Washington State Department of General Administration
Office of State Procurement, PO Box 41017, Olympia, WA 98504-1017

The Department of General Administration is an equal opportunity employer. General Administration does not discriminate on the basis of race, religion, gender, age, nationality or disability. To request this information in alternative formats, please call: (360) 902-7400, or TDD (360) 664-3799

Notes:

- I. This contract is subject to RCW 43.19.190(2) & RCW 43.19.1905(7): which authorizes state agencies to purchase materials, supplies, services, and equipment of equal quantity and quality to those on state contract from non-contract suppliers. Provided that an agency subsequently notifies the Office of State Procurement (OSP) State Procurement Officer (SPO) that the pricing is less costly for such goods or services than the price from the state contractor.

If the non-contract supplier's pricing is less, the state contractor shall be given the opportunity by the state agency to at least meet the non-contractor's price. If the state contractor cannot meet the price, then the state agency may purchase the item(s) from the non-contract supplier, document the transactions on the appropriate form developed by OSP and forwarded to the SPO administering the state contract. (Reference General Authorities document)

If a lower price can be identified on a repeated basis, the state reserves the right to renegotiate the pricing structure of this agreement. In the event such negotiations fail, the state reserves the right to delete such item(s) from the contract.

- II. State Agencies: Submit Order directly to Contractor for processing. Political Subdivisions: Submit orders directly to Contractor referencing State of Washington contract. If you are unsure of your status in the State Purchasing Cooperative call (360) 902-7415.
- III. Only authorized purchasers included on the State Purchasing Cooperative (SPC) listing published and updated periodically by OSP may purchase from this contract. It is the contractor's responsibility to verify membership of Political Subdivisions/Non-Profit Corporations in the SPC prior to processing orders received under this contract. Contractors shall not process state contract orders from unauthorized purchasers.

Special Conditions:

1. **Update Contractor information:** DustChem has notified us of changes to their firm's contract contact person, cel telephone number and company federal tax identification number. Reference Contractor Identification attachment.
2. **Add Pricing For Additional WSDOT Delivery Locations:** Effective November 3, 2000, at WSDOT's request pricing for American West's CalBan C70 was added to this contract for additional WSDOT delivery locations. Reference Locations, Products and Prices attachment.
3. **Contract Extension:** Effective May 15, 2000, this contract has been extended for one additional year (May 15, 2000 through May 14, 2001) under existing contract terms, conditions, specifications and pricing, with the following two exceptions:
 - For Dust Chem (Contractor C) pricing will decrease by \$.60/ton, with new prices listed in the attachment.
 - For American West (Contractor E), minimum delivery is 30 tons with \$75.00 double drop fee assessed for split drops.
4. **Delivery of Liquid Deicers:** As an option on liquid deliveries only, Contractor may use a legibly printed ticket from a flow meter that has been tested and certified by a purchaser approved state agency of Weights and Measures. The certification of the meter shall not be older than one year. Purchaser may request that the meter be retested and certified again during the delivery year if the data from the meter is in question. This retesting and certification shall be done at no additional charge to the Purchaser. At any time Purchaser may choose to spot check a delivery of liquid product by having the load weighed on certified scales before and after delivery to insure

the accuracy of the flow meter. No additional charge shall be assessed the Purchaser for spot checking deliveries of liquid product.

5. **Add New Deicer Product to Two DOT Sites:** Effective December 29, 1999, add CalBan C70 to contract for Everett and Monroe Maintenance Sites, reference Pages 14 and 15.
6. **Clarify Minimum Order Quantity:** There has been some question as to minimum order quantity on the contract. In most instances, the WSDOT site should be able to take a full load of the product being ordered in normal truckload quantities for that particular product. However, in unusual instances, it may not be possible for such an order quantity to be ordered for a specific site. In such instances, the contract specifies a "Minimum order" as being "Truck Load - 20 Tons."
Perhaps for those few orders where less than a normal full truck load quantity is ordered, a "no-charge drop shipment" to another WSDOT site can be arranged. In this way the negative impact of freight costs can be minimized. If it should be necessary for WSDOT to actually order less than 20 tons, than a split shipment drop charge up to \$40.00 will be allowed.
7. **Product Change From DustChem (Contractor C):** Effective November 15, 1999, DustChem replaced their L1 = IB4 30% magnesium chloride product (called FreezGard with 4% Ice Ban inhibitor) with a new product which includes FreezGard plus 0.75% TEA (Triethanolamine). Characteristics of the new product are available from the supplier. (Two other L1 products - FreezGard with 10% Ice Ban inhibitor (L1 with IB10) and FreezGard with 15% Ice Ban inhibitor (L1 with IB15) - will still be available from the contractor with no price change.)
8. **Add L1 and L2 deicer products:** Effective December 9, 1999, L1 deicer product from DustChem was added to contract for South Central Region, Connell Maintenance Site, MA 3, SR 260, MP 6.9, ½ Mile North of SR 260 on Columbia Street (reference page 27 of attachment for pricing and order quantities). Effective December 9, 1999, L2 deicer products from American West were also added to the contract for Connell Maintenance Site, (reference page 27 of attachment for pricing and minimum order quantity).
9. **Correct pricing error for three North Central Region locations:** See page 20 of the Locations, Products and Prices attachment for correct pricing for American West for L2 products C80, C70 and C60 for Mansfield, Omak Grade, and Okanogan Maintenance Site.
10. **Add Delivery Locations for S2 Supplied by Cargill Salt (Contractor D):** At the request of WSDOT's Northwest Region, effective November 23, 1999 pricing for S2 (CG-90) product delivered to eight additional maintenance sites was added to the contract. See Locations, Products and Prices attachment for new prices.
11. In response to an increase in estimated L2 purchase requirements for the 1999-2000 winter season, the Contractor (American West Environmental Suppliers) has offered a price decrease of approximately two percent (i.e. decreases of \$2.00/ton for C80, \$3.00/ton for C70 and \$3.00/ton for C60). New product prices for each delivery location became effective October 14, 1999, and are as listed in the attached price sheet.
12. The concentrations for the deicer products are as follows:
L1 = 30 percent MgCl (magnesium chloride)
L2 = 32 percent Base CaCl (calcium chloride)
S1 = NaCl plus corrosion inhibitor
S2 = S1 plus 10 percent Mg
S3 = S1 plus 20-22 percent Mg
S4 = CMA (calcium chloride acetate)
13. Commodity Codes for the deicer products are as follows:

S2 = CG-90 (10 percent Mg)	9620-011-060
S3 = CG-90(22 percent Mg)	9620-011-080
S4 = CMA	9620-011-100
S1, Deicer, ice slicer-meltdown 10 or equal (NaCl plus corrosion inhibitor) (Note: S1 is a solid product mixed with WSDOT supplied sand before application on roadway.)	9620-011-210
L1 = IB4 (effective November 23, 1999 limited supply)	9620-008-004
L1 = new product: magnesium chloride product - FreezGard Zero with 0.75% TEA (Triethanolamine)	
L1 = IB10	9620-008-010
L1 = IB15	9620-008-015
L2 = CalBan	9620-030-050
L2 = C80	9620-030-080
L2 = C70	9620-030-070
L2 = C60	9620-030-060

FIELD DELIVERY OF PRODUCTS

- A. The bill of lading and/or invoice for each shipment must contain the following information.
1. Name of product.
 2. Contractor and manufacturer of product.
 3. Destination of delivery.
 4. Contract unit of measure.
 5. Total number of units being delivered.
 6. Contract unit price for product delivered.
 7. Total weight of delivery (certified scale ticket).
 8. Total price for units delivered.
 9. Lot number of product (products) being delivered. The lot number must enable purchaser to track a delivered product back to its manufacture point, date of manufacture and specific batch.
 10. Transport information--Name of transporting company, tank, trailer or rail car number, point and date of origin.
 11. A copy of the original bill of lading.
 12. For liquid products include the Percent Concentration and Specific Gravity.

The Purchaser will not process invoices for payment until the contractor has met all requirements under this section.

- B. Contractor will be responsible for all necessary equipment to transfer liquid deicers to purchasers' storage tanks.
- C. Purchasers storage tanks will be fitted with a 3-inch male pipe fitting to allow for unloading of product.
- D. One 16-ounce sample of the liquid or dry product being delivered will be taken from the delivery container before the product is unloaded.
1. If the load is liquid, samples will be taken from the transfer hose only after no less than one half of the load has been discharged or samples may be taken from the delivery container with a bailer tube.
 2. If the product is dry, about 8 ounces of material will be taken from the top 4 inches of the load and the remaining 8 ounces at a depth of about 24 inches. This is important to verify separation or non-separation of product. All samples are to be taken prior to unloading.

- E. Each shipment shall be accompanied by a current and clearly legible MSDS.
- F. An anti-foaming agent will be available from the contractor for use as needed, at no additional charge to the State, to control foaming during loading, unloading, and agitation of liquid deicers.
- G. All orders will be placed by fax. The official order date shall be the date of the fax transmittal if received by the contractor before 2:00 p.m. (all order times reflect contractor time) and the next day if received by the contractor after 2:00 p.m. contractor will fax back to the buyer a confirmation of receipt and an estimate of the order shipment date within 2 business hours.
- H. All material is subject to inspection and analysis as delivered. No precipitate or flocculation in liquid products shall be allowed in excess of the specification limits. Material portraying these or other uncharacteristic traits when delivered may be immediately rejected at the option of the buyer or their representative at the delivery location. All products may be assessed penalties for late deliveries or poor quality. Any problems must be noted at the point of delivery by WSDOT personnel; documented, and relayed to their Regional Supply officer for action.
- I. Deliveries shall be made during normal working hours (Monday through Friday between the hours of 8:00 A.M. and 4:00 P.M. for all time zones), unless otherwise requested or agreed to by purchaser. Any deliveries made without proper advance notification or outside of the established delivery times (unless otherwise authorized in advance) will be assessed an initial penalty of 25% of the purchase price of the product. See "J" for details.

NOTE: Other charges (i.e. sales tax) if applicable will be adjusted to reflect the new purchase price when a penalty is taken as a reduction of purchase price.

- J. Delivery shall be made on or with-in two (2) calendar days or less on all orders received by the contractor during the months of October to April and 15 days or less on orders placed during other months. In the event the contractor fails to deliver within two calendar days as required, on day 3 or 16, a 25% late delivery penalty will be assessed. An additional 5% penalty per day will be assessed for each day of delay beginning with day 4 or 17 (depending on month of order) and continuing until delivery is made.

The late delivery fee assessment will be deducted from the payment of the invoice for the specific load of product not delivered according to the terms of this agreement. Consistently late deliveries may result in contract termination.

During the months of October to April, when orders larger than 50 tons (2 loads) per location are placed, 50 tons of that order must be delivered within the 2 day time period or penalties will apply and a late delivery report is required. If the contractor can not deliver the entire order at once, the balance must be delivered in a minimum of 50 ton quantities on daily deliveries beginning immediately after the first delivery, or as agreed to by the purchaser. This section does not prohibit delivery of an entire order at one time nor any other delivery schedule that exceed the conditions of this contract. Any assessments or deductions charged for improper notification and/or delivery will be accompanied with verification of order and delivery date.

- K. Penalties assessed for late deliveries caused by what the contractor feels are "reasonable or uncontrollable circumstances" shall within seven (7) calendar days be addressed with the respective Regional Supply officer by means of a late delivery report. The Supply Officer will consult their respective Maintenance Engineer and notify WSDOT Purchasing (Gary Smith) with specifics of problem and estimate of penalty. WSDOT Purchasing will review and work with the Office of State Procurement for action and final determination of penalty if any.

FIELD INSPECTION, UNLOADING, SAMPLING AND TESTING

BEFORE ALLOWING ANY PRODUCT TO BE UNLOADED DEPARTMENT OF TRANSPORTATION
PERSONNEL WILL ADHERE TO THE FOLLOWING PROCEDURES:

A. INSPECTION

1. Document and maintain records on all deliveries, including those that are rejected.
2. Check to assure that the product is being delivered according to the terms of the contract. This includes but is not limited to the following:
 - a. Date of the order.
 - b. Date and time of delivery.
 - c. Verification of advance delivery notification.
 - d. Delivered within allowable times.
 - e. Name of delivery company and license plate numbers.
 - f. Are any penalty assessments required?
 - g. Is the product being delivered what you ordered?
 - h. Document all procedures prior to unloading of product.
 - i. Verify that all papers required of a delivery are present, complete, and legible.
 1. Legible and current MSDS sheet.
 2. Certified weight slip.
 1. Accurate, complete, and legible bill of lading and/or invoice with the information as required in Section III Part A

B. SAMPLING AND TESTING

1. One 16-ounce sample of all products will be taken from each load of product being delivered at the time of delivery. Clearly label samples for identification. Send the sample directly to Chad Sherrel at the departments Material Testing Laboratory MS 47635. Be sure the Transmittal form is place in the box and contains at least the following information; Manufacture or Contractors name, name of product, lot number of product, shipping date, date received, name of delivery point, and name and phone number of person who received the load and took the samples. This sample will be used for testing and/or fingerprinting at the department's expense to insure product quality. Test results from the Headquarters Materials Laboratory will be final and in the best interest of the State. There will be written notification of test results only if a problem is detected.
2. Check and record the specific gravity of the samples.
3. Samples sent to the Headquarters Materials Laboratory will be tested for conformance to specification during the year. Each type of product may be tested for those parameters listed in the General Specifications and from the appropriate Category.

C. UNLOADING

1. Visually inspect the load to determine if there are any obvious reasons why the load should be rejected.
2. Note the amount of product currently in storage prior to unloading.
3. Visually inspect the delivered product again while unloading. If problems are noted that are a cause for rejection of the load, halt the unloading process. Take photos if applicable and record any pertinent information. Conduct the following procedures if the material is to be rejected.
 - a. If material fails initial inspection or testing reload the product and reject the load.
 - b. If reloading can't be done, (mixed with previous material) note the amount of product (liquid only) pumped into the tank and total product now present in the tank.
 - c. Circulate the tank and then pull two one-gallon (4-Liter) samples of the contaminated deicer material now in the tank
 - d. Check and record the specific gravity of the samples.

- e. Take appropriate action as needed to assure the integrity of product on hand if possible. Will all products on hand have to be removed?
- f. Send samples directly to Chad Sherell at the Headquarters Materials Laboratory.
- g. Immediately advise the Regional Purchasing Officer of any ordering, delivery, storage, or product quality issues.

CONTRACTOR INFORMATION

Contractor A: Cryotech Deicing Technology

Contact: Roxanna Huffman

Phone: 319-372-6012

Fax: 319-372-2662

Federal ID No.: 33-0270225

Supplier No.: 9

Payment address: P.O. Box 513120, Los Angeles, "CA 90051-1120

Order placement address: 6103 Orthoway, Fort Madison, IA 52627

Ordering procedures: See notes, Page 2

Minimum orders: 20 Metric Ton Truck Load
